

ELECTRONICS & TELECOMMUNICATION ENGINEERING

M.Tech. (Electronics-Digital Systems)

Effective from A. Y. 2011-12

INDEX

Item	Page No.
PG Rules and Regulations	2
Detailed Syllabus	13
Annexure-I: List of Professional Science/Elective courses offered by ALL departments	37
Annexure-II: List of Liberal Learning courses offered at Institute level	38

List of Abbreviations

Sr. No.	Abbreviation	Stands for:
1	DEC	Departmental Elective Course
2	PCC	Program Core Course
3	LC	Laboratory Course
4	HSSC	Humanities and Social Science Course
5	MLC	Mandatory Learning Course
6	LLC	Liberal Learning Course
7	OEC	Open Elective Course
8	SEC	Science Elective Course
9	PSEC	Program Specific Elective Courses

**M. Tech., RULES AND REGULATIONS
(Effective from 2011-12)**

**COLLEGE OF ENGINEERING, PUNE
Wellesley Road, Shivajinagar, Pune 411005**

1. Rules

1.1 The Senate and BOG, College of Engineering, Pune, recommends University of Pune to award the degree of Master of Technology (M. Tech) in Engineering to those who have successfully completed the stipulated Postgraduate Masters Program.

1.2 The Postgraduate Masters Program with the governing Rules and Regulations are formulated & approved by the Senate and BOG of the institute. The Senate can modify or change the course structure, the governing rules and regulations from time to time and shall recommend them to BOG for its approval. These rules and regulations will be applicable to any candidate seeking admission for M. Tech/P.G. programme in the institute.

1.3 A candidate becomes eligible for the recommendation to the Pune University for the award of the M. Tech. degree after fulfilling all the academic requirements prescribed by the Senate of the Institute.

1.4 Director, COEP and Chairman Senate would appoint a Professor from the Institute to work as a Chairman of the PG admission committee on his/belief. Chairman, PG Admissions would be responsible for the entire admission process including scrutiny of applications and conduct of entrance test, interviews of the candidates etc. He/she would be assisted by the respective departmental heads and departmental admission committee appointed by the Director.

2. CATEGORIES OF M. TECH. STUDENTS

The Institute admits M. Tech students under the following categories:

I) REGULAR (FULL-TIME)

These are students who work full time for their M. Tech. degree and receive assistantship from the Institute or any other recognized funding agency.

II) SPONSORED (FULL-TIME) STUDENTS

A candidate in the category is sponsored by a recognized R&D organization, national institute, governmental organization or industry for doing M.Tech in the Institute on a full time basis. He/she should have at least two years of working experience in the respective field. He/She will not receive any financial support from the Institute. Sponsorship letter (Form I) should be attached with the application. During the course of programme if a regular student secures a job and wishes to join the same, then he/she will be treated as a sponsored candidate and he/she will have to get the sponsorship letter from him employer. He/she would be charged institutional fees as for sponsored candidates.

III) PROJECT STAFF

This category refers to candidates who are working on sponsored projects in the Institute and admitted to the M. Tech. program. The duration of the project at the time of admission should be at least 2 years. This category of students may be registered on a full-time or a part-time basis.

IV) INSTITUTE FACULTY

This category refers to the candidates who are the staff of College of Engineering , Pune, who can attend classes at the Institute while employed. These candidates should be able to attend regular

classes as per the schedule of the Institute. The applicant must be a regular employee of the institute with at least two years of experience with the institute at the time of admission and be engaged in professional work in the discipline in which admission is sought. No financial assistance will be provided by the Institute to such students. A No Objection Certificate from the Head of the Department must be enclosed at the time of applying. This candidate would pay regular fees of the institute under full/part time student category and no concession in institute fees can be allowed.

V) FOREIGN STUDENTS

This category refers to all the Foreign Nationals, who are eligible for Admission to the M.Tech program and who have a certification from the Pune University Foreign Students Cell about their admissions to M.Tech. These students will submit a certificate from the Pune University certifying their Equivalence of Courses at undergraduate levels. These students will have to appear for the institute entrance examination and also a English language test, conducted by the institute. If these students fail in the English language test their applications will be rejected even though they pass in the institute admission test. No financial assistance of any sort will be available for these students. Before admission, these students will have to get a clearance about their background check by the Department of Home, Government of India. A candidate in this category will be admitted **on a full time basis** subject to compliance of various norms laid down by the competent authority from time to time.

3. MINIMUM QUALIFICATIONS

Students for admission to the M. Tech. Program in Engineering Departments must satisfy one of the following criteria:

- (i) Bachelor's degree in Engineering/Technology or equivalent in an appropriate area, with a minimum of First Class/60% marks or CGPA of 6.5 on a scale of 10 or equivalent (CGPA of 6.00 or equivalent in case of SC / ST).
- (ii) Valid GATE score for Regular (full-time) students.

Departments may specify additional requirements over and above these minimum requirements. All the Non-GATE candidates will have to undergo an entrance test conducted by department in which he/she is applying. Passing in this test will be mandatory for admission.

For the Foreign Students the criteria as in para 2(V) above will be applicable. For these students Institute Admission Test as well as English Test will be mandatory.

4. ADMISSION PROCEDURE

4.1 Admission to the M. Tech. Program of the Institute will normally be in the months of June/July every year. For admission an advertisement will be issued in the month of April/May in National level English news paper, State level Marathi News papers as well as on the Institute website.

4.2 Admission to all the category of students is granted on the basis of GATE scores and / or an interview / admission test held usually during the month of June or July every year. It will be mandatory for every candidate to appear for the Entrance Test and Interview. No absentia of any sort would be allowed.

4.3 The applicants who have completed or are likely to complete all the examinations including the thesis oral examination, viva etc. of the qualifying degree by the date of admission to the program may be considered for admission; however, if admitted, they must produce the evidence of their having passed the qualifying degree examination with the specified minimum marks/CPI (as specified in clause 3) within 8 weeks of the beginning of the semester, failing which their admission is liable to

be cancelled. In case of any dispute or discrepancy decision of the Director COEP and Ex-officio Chairman of the Senate will be final and shall be binding on the candidate.

4.4 Candidates seeking admission for the M.Tech course other than the area in which candidate has completed his/her bachelor's degree will be eligible to apply provided they have a valid GATE score in the area in which they wish to pursue their M.Tech. These candidate will not be eligible for the scholarships from the external funding agencies. These students will have to under go Institute Entrance Test/Interview conducted by the concerned department.

5. FINANCIAL SUPPORT

Students admitted to the M. Tech. Programs will be considered for assistantships, fellowships etc. subject to the following norms:

5.1 A student must have a valid GATE score at the time of admission.

5.2 Students receiving assistantship from the Institute or from any other funding agencies will be required to perform academic duties assigned to them by the departments as per rules in force from time to time.

5.3 The continuation of the assistantship/fellowship will be subject to satisfactory performance of the duties assigned by the department and satisfactory progress in the postgraduate program. Financial assistance of the candidates failing to secure minimum grades in the semester examination would be stopped without any prior notice.

5.4 Financial assistance will normally be for a maximum period of two years. In no case, it will be extended beyond 2 years.

5.5 No financial assistance from the Institute will be available to foreign students. Project staff will get funding from project as per rules but will not get any additional assistance from the Institute.

5.6 Only those students who are currently registered in the postgraduate program shall be entitled to scholarships. The students on leave longer than that specified under the leave rules, and those who are not registered are not entitled to scholarship.

6. LEAVE RULES

6.1 An M Tech student is eligible for maximum 30 days of leave in a calendar year.

6.1.1 The leave of 30 days includes medical and all other leaves, in an academic year. If any Saturday, Sunday or Holiday falls during the leave, they will be counted towards the leave except for such holidays prefixed or suffixed with the leave. **The accumulated leave can be availed during vacation only.**

6.1.2 Out of the 30 days of leave per annum, an M. Tech. Student will be permitted to avail maximum 15 days of leave on completion of each semester. However, any leave not availed at the end of any semester can be carried over to the next semester and the cumulative can be availed together, subject to a maximum of 30 days at a time.

6.1.3 During the semester period, (i.e. July – November and January – May), a student will be allowed only a maximum of 5 days of leave .

6.2 Absence without obtaining prior sanction of leave will be considered as an act of indiscipline and shall entail reduction of scholarship on a prorata basis, besides any other action that may be decided by the Institute.

6.3 Any absence over and above the prescribed limit of admissible leave shall entail deduction from the scholarship, besides other actions as may be decided by the Institute.

6.4 If a student remains absent or discontinues from the course for a period of more than 3 months his/her admission to the course will be automatically cancelled.

6.5 If a student is unable to complete his/her M.Tech within a period of two years, he/she must apply for permission for the extension of time by six months immediately after completion of two years, with recommendations of the concerned guide and head of the department to Dean Academics. Dean academics will seek the approval of the Director COEP and the Chairman, Senate for granting such extensions on case to case basis. Maximum two extensions of six months duration would be permissible for M.Tech student from any category of students as stipulated in Section(2) above. This extension period will not exceed the total period of three years from the date of admission of the candidate in the institute. Candidate will have to pay institute fees prevailing during this extension period.

6.6 If a student fails to complete his/her M.Tech within a period of four years from the date of admission for the course he/she will automatically cease to be a student of the institute and his/her admission would be automatically cancelled.

7. REGULATIONS

7.1 Rules and regulations

All the rules and regulations pertaining to academics, academic calendar, semesters, discipline etc. will be same as that of B.Tech. regulations.

7.2 Admission

Candidates whose selection is approved by the Chairman, Senate will be admitted to the M. Tech. program of the Institute after payment of the prescribed fees prevailing at the time of admission. BOG reserves the right to modify the Institute fees time to time.

7.3 Academic requirements

7.3.1 Semester load and course units

A semester load would be as per the Syllabus structure in force and as recommended/modified by the Senate from time to time. The minimum credit requirements for the successful completion of M.Tech. would be as specified in the syllabus structure prevailing at the time of admission for the course. The current minimum credits for the completion of M. Tech is 80 credits as specified in the syllabus structure. Any changes subsequently made by the Senate in the minimum credit requirements or syllabus structure will be applicable to only the new/fresh students and not applicable to the old candidates.

7.3.2 The residence requirements for students registered in M Tech. is four semesters. They will be required to complete a minimum credits of load as specified in the course structure in force. Every M Tech student must complete prescribed courses as specified in the syllabi structure. SGPA and CGPA will be calculated on the basis of all the courses taken by the student. No regular student/sponsored student/Research Staff/Institute Faculty/ Foreign student registered for the M Tech program shall continue in the program for more than 3 years after the first registration. The course and research requirements in individual departments/program may be over and above the minimum stated here. The departments/program shall obtain prior approval of the Senate of such requirements and will also inform the students in their postgraduate program at the time of their admission.

7.3.3 Grades and points

(a) The performance of the students in their course work will be evaluated in terms of letter grades: AA, AB, BB, BC, CC, CD, DD & F. These grades are equivalent to the following points/ratings on a 10 point scale representing the quality of performance.

AA = 10, AB = 9, BB = 8, BC = 7, CC = 6, CD = 5, DD = 4, FF = 0.

(b) If a student has done a part of the course work, but has for a genuine reason not been able to do the remaining part, the instructor may send the grade 'I' (incomplete). In this case the student must contact the Instructor soon after the examination and if the Instructor is convinced that the reasons for missing a part of the course/examinations are genuine he may let the student make up for the portion missed. The 'I' Grade can be converted into a regular grade by the Instructor within two weeks of the last date of the End Semester Examination. Otherwise, this will automatically be converted into 'F' Grade.

7.3.4. Academic performance requirements

(a) The SGPA (Semester Grade Point Average) or CGPA (Cumulative Grade Point Average) of a student in any particular semester is calculated as follows:

(i) The points equivalent to the grade awarded in each course for which the student has registered is multiplied by its unit rating.

(ii) These products are added and sum is divided by the total number of units. The ratio is the SGPA or CGPA depending on whether the number of units refer to those in that particular semester or to those in the total period of student's postgraduate program.

(b) **The minimum CGPA requirement for continuing in the M. Tech. program is 5.0.** However, M Tech student securing a CGPA between 4.5 and 5.0 may be allowed to continue in the following semester on the recommendation of the DPPC (Departmental Postgraduate Program Committee) and with approval of the Senate.

Students who secure a CGPA below 5.0 in two consecutive semesters will not be allowed to continue in the postgraduate program. Students must obtain a minimum CGPA of 5.0 in order to graduate. In the first semester in which the student registers the minimum CGPA (SGPA) requirement can be relaxed to 4.5.

7.3.5 Thesis/Project

(a) Project duration shall be one year or two semesters. Thesis supervisor(s) for a student will be appointed from amongst the faculty members of the College of Engineering, Pune. Departments will evolve modalities for appointing of supervisors keeping in view the students' aspirations and faculty interest. The DPPC will co-ordinate this activity and will formally communicate the appointment of thesis supervisor(s) of a student to the COE. No change/addition of Supervisor(s) is allowed after the thesis has been submitted to the academic section. In case there has been a change/addition in the Supervisor(s) the thesis will be submitted not earlier than three months from the date of communication of such change/addition to the academic section.

No student once registered for thesis/project units will be allowed to continue the program without a Thesis Supervisor having been appointed by the DPPC. No student will have more than two

supervisors. No change in thesis supervisor(s) will be allowed without the consent of the Chairman, DPPC. In exceptional cases, with prior approval of the Chairman, Senate on the recommendation of the DPPC and COE a student may be allowed to have a co-supervisor from outside the institute.

(b) Project evaluation:

Project evaluation shall be done in two phases in both the semesters. First phase of evaluation shall be in the middle of the semester and second phase of the examination shall be after the end-semester theory examination of the semester.

There will be separate grades awarded for the project course in two semesters. The credits in the first semester shall be relatively less and evaluation shall be based on the literature survey, problem definition, problem formulation, fabrication or software development and preliminary results.

A brief report is required to be submitted at the end of semester. The evaluation and grading will depend on the candidate's performance in the two phases of evaluation in the semester.

The second semester of the project shall carry relatively more weightage and the evaluation shall involve external examiners. The details are provided in the following sub-section.

(c) Thesis/Project Oral Examination Committee :

The thesis/project will be examined by an oral examination committee consisting of the supervisor(s) or in his/her absence the program co-ordinator with prior consent of the supervisor and at least two but not more than four other faculty members of the institute proposed by the thesis supervisor(s)/program co-ordinator in consultation with Head of the Department, recommended by the convener, DPPC and approved by the Dean Academics and COE. The thesis supervisor/program co-ordinator will act as the convener of the committee and one of the members of the committee will be an External Examiner as a part of the panel of examiners.

(d) The Convenor, DPPC will submit to the academic section for approval of the Chairman, DPPC the names of the thesis/project examiners on the prescribed form, at least two weeks before the submission of the thesis. Unbound typed copies of thesis/project one for each examiner prepared according to the prescribed format available in the academic section will be submitted at least one week before the probable date of the oral examination. The oral examination will be held within two months from the date of submission of the thesis/project. If however the student does not make available for the examination, his/her program will be deemed to have been terminated. Request for revival of the program by such a student should be addressed to the Chairman, Senate.

The Department will record the date of submission of the thesis/project and arrange to send the thesis to the examiners. The supervisor/program co-ordinator will inform the examiners of the date of the oral examination and send a copy to the academic section. The thesis/project will be evaluated and the Oral Examination conducted by the Committee on the scheduled date. The report will be communicated by the Convener, DPPC to the academic section for record and necessary action.

The grade to be awarded to a student shall be evolved by the committee by consensus. The report of the oral examination committee including the grade shall be submitted to the Convenor, DPPC by the committee.

(e) Acceptance/Rejection of the Thesis/Project

A thesis/project will be considered to have been accepted if all members of the committee recommend its acceptance. Otherwise thesis/project will be considered to have been rejected. If a thesis/project is rejected along with a recommendation by the Committee for resubmission after incorporating and modification/correction suggested by the Committee, oral examination for the re-submitted thesis/project will be conducted by the same Committee unless otherwise approved by the Chairman Senate. If the resubmitted thesis/project is rejected, the matter will be reported to the Senate for appropriate action. Acceptance of thesis/project will be reported by the COE to the Senate for approval.

7.3.6. Provision for the Change of Guide

Project Guide may submit his request for change of guide to the HoD of the concerned department stating the reasons for the change request. HOD of the concerned department will forward the Application with his/her recommendations and name of the new proposed guide to the Dean Academics for the permission. Dean Academics in consultation with the Director, COEP and Chairman of the Senate may approve such applications.

Procedure for submission of M. Tech. Project Thesis and Oral Examination

1. The supervisor(s) shall be satisfied that the work has been completed. The supervisor(s) shall forward a list of examiners (comprising of at least two but not more than four faculty members from the department, in addition to the supervisor(s) and one member from outside the department or an external expert) through the Departmental PG Coordinator, to HOD.
2. The HOD will then forward the list of examiners to the Dean of Academics for the approval at least 15 days before submission of the thesis.
3. Following the approval, unbound copies of the thesis (one each for every examiner) shall be submitted to the Department (PG Coordinator) at least one week before probable date of the examination.
4. The PG Coordinator, will fix the date of oral examination, make an announcement (through notices and e-mail) and forward unbound copies of thesis to the examiners. The date of oral examination shall be communicated to the COE.
5. The oral examination of a M. Tech. Project shall be held as per announced schedule and it shall be an open one.
6. The Supervisor / PG Coordinator (if Supervisor is not available at the time of oral examination) shall be the convener of the oral examination committee. The committee shall evaluate the project of the candidate on the basis of presentation of the report, originality of the contents therein, demonstration of equipment model/ hardware/ software developed, the oral presentation and oral examination. In case the committee recommends a major revision and recommends a re-examination of the project, Grade "I" shall be awarded and the student shall be required to continue the project and resubmit the thesis within a period of two months. In case the committee rejects the thesis, Grade "F" shall be awarded and the student shall be required to re-register for the project in the next semester.
7. On successful completion of Oral Examination, each student shall submit bound copies of the thesis making corrections, if any, suggested by the examiners (one each to the supervisor(s), Academic

Section and the department). The academic section will forward the copy of the thesis/report to the Central library after verification.

8. The candidate should also submit a soft copy of the thesis in pdf format to the PG Coordinator who shall compile all the M. Tech project reports of the academic year of the department on a CD and same shall be placed in the dept library and institute website server.

FORM-I

Format of Certificate by the Employer/Management for Sponsored Candidates

This is to certify that ,

Shri./Smt. _____

is working in this Institute as _____
since _____ and he/she is permitted to study for **M.Tech program** at College of Engineering, Pune. If he/she is admitted to the said program, he/she will be permitted to attend the College as a full time student during the working hours of the College till completion of his/her program. We understand that he/she will fulfill institute norms for the attendance.

This is further to certify that he/she has been appointed on regular basis and his/her appointment is not temporary.

FORM II – APPLICATION FOR THE EXTENSION OF TIME

Reference No.

Date:

To

The Dean Academics,
College of Engineering , Pune

Sub : Grant of six months extension in order to complete M. Tech. Program

Dear Sir,

I of Mr./ Mswho is M.Tech student inDepartment and pursuing my M. Tech inspecialization. I have joined the M.Tech. course in the academic year I am unable to complete my M.Tech. in the prescribed period of two years. I am aware that maximum duration of my M.Tech. course is four years and my admission for the M.Tech will get cancelled after a period of four years from the date of admission and no extension of time is permissible after three years.

I may be permitted Six months extension for completing M. Tech. Program at your Institute as a full - time student.

Date:

Signature of the Student

Recommendation of the Project Guide

FORM III – Undertaking By the Full Time M.Tech (Non-Sponsored Student)

Reference No.

Date:

To

The Dean Academics,
College of Engineering , Pune

Sub : Undertaking by the M.Tech Students who is a Non-Sponsored Full Time Student

Dear Sir,

I of Mr./ Ms is M.Tech student inDepartment and pursuing my M. Tech inspecialization. I have joined the M.Tech course in the academic year

I here by solemnly affirm that I am not in any sort of full time/Part Time or Visiting employment of any sort in any organization while joining my M.Tech as fulltime student. I do here by undertake that I will not engage myself in any sort of employment either fulltime/part time or visiting during my studentship as fulltime M.Tech student of College of Engineering, Pune, unless otherwise I am offered such privilege by COEP under a sponsored project.

I do understand that if I am found to indulge in such employment any time during my tenure as a Full Time M.Tech student of College of Engineering, Pune , my admission to M.Tech course will be immediately cancelled by the institute in addition to financial penalty and other disciplinary action initiated by Dean Academics, on behalf of the institute.

Date:

Signature of the Student

Recommendation of the HOD

OEC- I IS-501: Image Processing and Analysis

Teaching Scheme

Lectures : 3 hrs/week

Examination Scheme

T1 ,T2- 20 Marks, End-Sem Exam - 60

Course outcomes:

At the end of the course, students will demonstrate the ability to:

- Understand the background of image representation and characteristics.
- Write algorithms of image analysis in transform domain.
- Study and implementation of image enhancement , restoration, and image analysis algorithms.
- Study and implementation of image compression
- Applications of image processing.

Syllabus Contents:

Image perception, monochrome and color vision models, Image sampling and quantization. Two dimensional orthogonal transforms - DFT, FFT, WHT, Haar transform, KLT, DCT. Image enhancement: Filters in spatial and frequency domains, histogram-based processing, homomorphic filtering. Image restoration: PSF, de-convolution, restoration using inverse filtering, Wiener filtering, maximum entropy-based methods. Color Image processing: Color models, color transformation, smoothing, sharpening, color segmentation. Morphological Image processing: dilation and erosion, basic morphological algorithms Image Segmentation: point, line and edge detection, edge linking and boundary detection, thresholding, region based Segmentation. Image attribute representation and description: boundary descriptors, regional descriptors Object Recognition: patterns and pattern classes, recognition based on decision – theoretic and structural methods.

Core-I DS-501: Digital System Design and HDL

Teaching Scheme

Lectures : 3 hrs/week

Examination Scheme

T1,T2 - 20 Marks End-Sem Exam - 60

Course Outcomes:

At the end of the course, students will demonstrate the ability to:

- Understanding of RTL design and verification techniques and methodologies.
- Have knowledge on Cadence tools [e.g. NCSIM] through lab exercises
- Have job opportunities in semiconductor industry or in academics
- Build the local eco-system in VLSI and Semiconductor field.

Syllabus Contents:

Fundamentals of Sequential Logic Design: Concept of FSM and use of state diagrams, use of ASM charts, S-R Latch, D Latch, J-K flip-flop, Master Slave Flip-flops and their characteristic equations, excitation tables and timing diagrams, metastability. Moore, Melay and mixed type synchronous state machines, synchronous design procedure, sync. Counter design, design using programmable devices. Asynchronous Sequential logic Circuit Design: Asynchronous design fundamentals, differences with synchronous design, Timing diagram specification, merger diagrams, making race-free state assignment using transition diagram, essential hazards. ASIC, FPGA and CPLD: Concept of ASIC, architecture of Xilinx 95XX series CPLD, 4XXX series FPGA, specifications and noise considerations, Typical applications, choice of target devices, speed grade, I/O pins and various resources. Introduction to VHDL and Elements of VHDL: Features of VHDL, concurrency, sequential behavior, used as test language, design hierarchies, levels of abstraction. Basic building blocks like entity, architecture, language elements, concurrent statements, sequential statements, signals and variables, configuration, operators, operator overloading, data types, component instantiation. Generate statement, process, loop statements, case statements, next statements, exit statements. Simulation Issues and Test Benches: Steps in simulation, simulation process, simulation delta, types of delays, types of simulation. Function o test bench, design methodologies for test benches, interpreting the test bench reports. Synthesis Issues: Introduction to synthesis, synthesis tools and their features, hardware modeling examples, synthesis guidelines

Core-II DS-503: Algorithms in Signal Processing

Teaching Scheme

Lectures : 3 hrs/week

Examination Scheme

T1, T2- 20 Marks, End-Sem Exam- 60

Course Outcomes:

At the end of the course, students will demonstrate the ability to:

- Design filters.
- Understand theory of multirate DSP, solve numerical problems and write algorithms.
- Have knowledge on the theory of prediction and solution of normal equations.
- Understand the applications of DSP at block level.

Syllabus Contents:

Overview of DSP'S, FIR filters, IIR filters, design techniques of linear phase FIR filters, IIR filters by impulse invariance, bilinear transformation, Linear prediction & optimum linear filters, stationary random process, forward- backward filters linear prediction, solution of normal equation Multirate DSP, Sampling rate conversion, polyphase filters, multistage decimator & interpolator, QMF, digital filter banks. Adaptive filters & spectral estimation, Minimum mean square criterion, LMS algorithm, Recursive least square algorithm, DFT in spectral estimation, Applications of DSP and Multirate DSP Voice processing, subband coding of speech signals, Oversampling A/D and D/A conversion, DTMF and other applications

Core-III DS-505: Embedded Processors

Teaching Scheme

Lectures : 3 hrs/week

Examination Scheme

T1, T2- 20 Marks, End-Sem Exam- 60

Course Outcomes:

At the end of the course, students will demonstrate the ability to:

- Compare and select ARM processor core based SoC with several features/peripherals in view of requirements of embedded applications.
- Identify and formalize architectural level characterization of Programmable DSP Processors

- Develop small applications by utilizing the ARM processor core based embedded platform and DSP processor based platform.

Syllabus Contents:

The Cortex-M3 processor: Applications, Simplified view – block diagram, programming model – Registers, Operation modes, Exceptions and Interrupts, Reset Sequence Instruction Set, Unified Assembler Language, Memory Maps, Memory Access Attributes, Permissions, Bit-Band Operations, Unaligned and Exclusive Transfers. Pipeline, Bus Interfaces Exceptions, Types, Priority, Vector Tables, Interrupt Inputs and Pending behavior, Fault Exceptions, Supervisor and Pendable Service Call, Nested Vectored Interrupt Controller, Basic Configuration, SYSTICK Timer, Interrupt Sequences, Exits, Tail Chaining, Interrupt Latency LPC 17xx microcontroller- Internal memory, GPIOs, Timers, ADC, UART and other serial interfaces, PWM, RTC, WDT Programmable DSP (P-DSP) Processors: Harvard architecture, Multi port memory, architectural structure of P-DSP- MAC unit, Barrel shifters, Introduction to TI DSP processor family VLIW architecture and TMS320C6000 series, architecture study, data paths, cross paths, Introduction to Instruction level architecture of C6000 family, Assembly Instructions memory addressing, for arithmetic, logical operations, Code Composer Studio for application development for digital signal processing, On chip peripherals

DEC-I DS-513: Advanced Computer Architecture

Teaching Scheme

Lectures : 3 hrs/week

Examination Scheme

T1, T2- 20 Marks, End-Sem Exam- 60

Course Outcomes:

At the end of the course, students will demonstrate the ability to:

- Understand the limitations of different architectures of computer.
- Understand the quantitative analysis of performance parameters for different architectures.
- Understand different issues of compilers and instruction set depending on type of architectures.

Syllabus Contents:

Overview of Parallel Processing and Pipelining Processing. Architectural Classification, Applications of parallel processing, Instruction level Parallelism and Thread Level Parallelism, Explicitly Parallel Instruction Computing (EPIC) Architecture, Case study of Intel Itanium Processor(IA64), Performance analysis.Pipeline Architecture-Principles and implementation of Pipelining, Classification of pipelining processors, General pipelining reservation table, Design aspect of Arithmetic and Instruction pipelining, Pipelining hazards and resolving techniques, Data buffering techniques, Job sequencing and Collision, Advanced pipelining techniques, loop unrolling techniques, out of order execution, software scheduling, trace scheduling, Predicated execution, Speculative loading, Register Stack Engine, Software pipelining, VLIW (Very Long Instruction Word) processor, Case study: Superscalar Architecture- Pentium, Ultra SPARC.

Vector and Array Processor- Basic vector architecture, Issues in Vector Processing, Vector performance modeling, vectorizers and optimizers, Case study: Cray Arch. SIMD Computer Organization Masking and Data network mechanism, Inter PE Communication, Interconnection networks of SIMD, Static Vs Dynamic network, cube hyper cube and Mesh Interconnection network.Parallel Algorithms for Array Processors: Matrix Multiplication. Sorting, FFT.

Multiprocessor Architecture- Loosely and Tightly coupled multiprocessors, Processor characteristics of multiprocessors, Inter Processor communication network, Time shared bus, Crossbar switch, Multiport Memory Model, Memory contention and arbitration techniques, Cache coherency and bus snooping, Massively Parallel Processors (MPP), COW's and NOW's Cluster and Network of Work Stations), Chip Multiprocessing (CMP), Case Study of IBM Power4 Processor, Inter Processor Communication and Synchronization Multithreaded Architecture- Multithreaded processors, Latency hiding techniques, Principles of multithreading, Issues and solutions, Parallel Programming Techniques: Message passing program development, Synchronous and asynchronous message passing, Message passing parallel programming, Shared Memory Programming, Data Parallel Programming Parallel Software Issues- Parallel algorithms for multiprocessors, classification of parallel algorithms, performance of parallel algorithms, Operating systems for multiprocessors systems, Message passing libraries for parallel programming interface, PVM (in distributed memory system), Message Passing Interfaces (MPI), PThreads (in shared memory system), Parallel Programming Languages : Fortran 90, Occam, C-Linda, CCC etc., Issues towards cluster computing. Introduction to Neuro Computing and Grid Computing

DEC-I DS-515: Communication Networks

Teaching Scheme

Lectures : 3 hrs/week

Examination Scheme

T1, T2- 20 Marks, End-Sem Exam- 60

Course Outcomes:

At the end of the course, students will demonstrate the ability to deal with:

- Protocol rules and algorithms, tradeoffs, rationale, routing, transport, DNS resolution.
- Network extensions and next generation architecture Wireless, mobile, sensor.

Syllabus Contents:

Network Design Issues: Scope, Manageability, node placement, Link topology, Routing Protocol selection. Network Performance Issues: Network Terminology, centralized and distributed approaches for networks. Networks performance analysis, Traffic classes, Traffic Control. Queuing Theory, Poisson's Model. Protocol Study: Intra and Inter Autonomous system routing protocols, ATM, 802.11, Bluetooth, SNMP, IPV6, Socket Programming, standard application layer Protocols, performance Analysis of the protocols (Mathematical approach). Network Troubleshooting, Network Security: Cryptography, Authentication, Firewalls, and Security, on emails, Network management Security. Network Applications: Wireless Networking connecting components & transmission techniques, LAN, WAN, INTRANET, INTERNET, Case studies, and voice over IP, Video conferencing, Digital Library. Network systems design using Network Processors: Network processor technology and architecture. Study of network processors like Intel's IXP 1200 network processors family.

LC DS-511: PG Laboratory I

Teaching Scheme

Practicals: 6 hrs/week

Examination Scheme

Marks - 100

Core I Digital System Design and HDL Lab

Laboratory Outcomes:

- At the end of the laboratory work, students will
- Design and implement a complete embedded digital system on FPGA.
- Design of digital systems including lower level components and integration of higher level IP cores,
- Simulating the design with test benches and synthesizing & implementing these designs with FPGA development boards including interfacing to external devices.

List of Experiments/Assignments:

1. Designing with combinational logic using MSI devices
 - a. Octal tristate buffer
 - b. MUX/DeMUX
 - c. ALU
 - d. Priority encoder
 - e. Multiplier
2. Designing with sequential logic
 - a. Up/down counter
 - b. Barrel shifter
 - c. Memory model
 - d. Shift register
 - e. Bus arbitration logic
 - f. State machine/vending machine
 - g. RISC CPU

Core II Algorithms in Signal Processing Lab

Laboratory outcomes:

At the end of the laboratory work, students will demonstrate the ability to:

- Design filters.
- Understand theory of multirate DSP and write algorithms.
- Have knowledge on the theory of prediction and solution of normal equations.

List of Experiments:

1. To design FIR filter with the given specification.
2. To design IIR filter with the required specification
3. To design Decimator with the required Decimating factor.
4. To design Interpolator with the required factor.

Core III Embedded Processors Lab

Laboratory Outcomes:

At the end of the laboratory work, students will demonstrate the ability to:

- Install, configure and utilize tool sets for developing applications based on ARM processor core SoC and DSP processor.
- Develop a prototype codes using commonly available on and off chip peripherals on the Cortex M3 and DSP development boards

List of Experiments:

Part A

Experiments to be carried out on Cortex-M3 development boards and using GNU toolchain

- Blink an LED with software delay, delay generated using the SysTick timer.
- System clock real time alteration using the PLL modules.
- Control intensity of an LED using PWM implemented in software and hardware.
- Control an LED using switch by polling method, by interrupt method and flash the LED once every five switch presses.
- UART Echo Test.
- Take analog readings on rotation of rotary potentiometer connected to an ADC channel.
- Temperature indication on an RGB LED.
- Mimic light intensity sensed by the light sensor by varying the blinking rate of an LED.
- Evaluate the various sleep modes by putting core in sleep and deep sleep modes.
- System reset using watchdog timer in case something goes wrong.
- Sample sound using a microphone and display sound levels on LEDs.

Part B

Experiments to be carried out on DSP C6713 evaluation kits and using Code Composer Studio (CCS)

- To develop an assembly code and C code to compute Euclidian distance between any two points
- To develop assembly code and study the impact of parallel, serial and mixed execution
- To develop assembly and C code for implementation of convolution operation
- To design and implement filters in C to enhance the features of given input sequence/signal

OEC-II IS-502-8: Artificial Intelligence and Neural Networks

Teaching Scheme

Lectures : 3 hrs/week

Examination Scheme

T1, T2- 20 Marks, End-Sem Exam- 60

Course Outcomes:

At the end of the course, students will demonstrate the ability to:

- Identify and formalize a given problem in the framework of solution by AI methods
- Design Fuzzy Logic based system for engineering applications including AN Network methods
- Deploy inconsistent information systems
- Understanding of major areas and challenges in evolutionary computing and Chaotic systems

Syllabus Contents:

Knowledge Representation: Propositional Logic, Inference Rules in Propositional Logic, Knowledge representation using Predicate logic, Predicate Calculus, Semantic net, Frames Inconsistent Information Systems: Basic Concepts of Rough Sets, Equivalence Class and Discernibility Relations, Lower and Upper approximations, Information Systems Framework using Rough Sets, Reducts and Core, Introduction to Rough Set Software ROSE, Rules extractions, Information Gain and applications Evolutionary Computing: Genetic algorithms, Introduction to Genetic Programming Dynamical Systems and Chaos: 1-D Maps, Chaotic orbits, Fixed Points, Chaotic attractors, Bifurcations, Fractals, Mandelbrot set, Time Series analysis Representation and Manipulation of Imprecision and Uncertainty: Type-I Fuzzy Sets, Membership Functions – Triangular, Trapezoidal, PI, T-Norm, S-Norm Operations, Fuzzy Hedges, Fuzzy Relations & Composition, Type-II Fuzzy sets introduction Engineering Adaptations of Fuzzy Systems: Fuzzy Object Class, Fuzzy Logic IC chips, Fuzzy Inference Engine, Rule based fuzzy expert systems, Fuzzy Controllers, case studies Neural Networks: Introduction to neural networks and perception, Neural net Architecture and applications Term Paper: Students in a group will prepare a review term paper on the current topics related to study units in IEEE format and present it in the classes. About 6 papers will be scheduled.

DEC-II DS-510: High Performance Networks

Teaching Scheme

Lectures : 3 hrs/week

Examination Scheme

T1, T2- 20 Marks, End-Sem Exam- 60

Course Outcomes:

At the end of the course, students will demonstrate the ability to:

- Apply knowledge of mathematics, probability, and statistics to model and analyze some networking protocols and apply Knowledge of contemporary issues in computer networks.
- Identify, formulate, design, analyze and solve network engineering problems.
- Use techniques, skills, and modern networking tools necessary for engineering practice and evaluate performance of Networks.

Syllabus Contents:

Types of Networks, Network design issues, Data in support of network design. Network design tools, protocols and architecture. VoIP system architecture, protocol hierarchy, Structure of a voice endpoint, Protocols for the transport of voice media over IP networks. Providing IP quality of service for voice, signaling protocols for VoIP, PSTN gateways, VoIP applications. Introduction, challenges, SCSI protocols and architecture: RAID, Backup and mirroring, Fiber channel attached storage. Network attached storage including NFS, CIFS and DAFS, Management of network storage architectures. New storage protocols, architectures and enabling technologies. Introduction to CDMA and spread spectrum system, CDMA standards, system architectures of wireless communication systems, physical, network and data link layer of CDMA, wireless LAN standards: IEEE 802.11b, ARPA. Overview of Information Theory. Lossless Compression: Run-Length Encoding, Facsimile compression, String-matching Algorithms. Lossy Compression: DCT, Wavelet compression. A model for internet security, security attacks, services, internet standards & RFCs, Cryptography, Conventional encryption, principles and algorithms, cipher-block, modes of operation, location of encryption devices , key distribution ,Public key cryptography principles and algorithms, RSA algorithm

DEC–II DS-512: Source and Channel Coding Techniques

Teaching Scheme

Lectures : 3 hrs/week

Examination Scheme

T1, T2- 20 Marks, End-Sem Exam- 60

Course Outcomes:

The course provides a general introduction to the topic of Information Theory with a focus on the application of Information Theory to communications in general and on channel coding and capacity in particular.

Syllabus Contents:

Information and Source Coding for discrete sources: mathematical models for Information, A Logarithmic Measure of Information: Average and Mutual Information, Entropy, Coding for Discrete Sources-Coding for Discrete Memoryless sources, Discrete Stationary sources, Shannon-Fano and Huffman algorithms, Arithmetic coding, transform based lossy coding, DCT, Quantization, JPEGs standard compression, Motion estimation and Compensation, Block matching algorithms, and MPEG-standard-1,2,3, Audio coding, psychoacoustic models, ADPCM, MPEG-Audio, Dolby Audio, Channel coding, Channel models, Channel capacity, Linear block codes, Error correction and detection capability, Usefulness of the standard array, Cyclic codes, Block codes examples such as Hamming codes, Convolution codes, Convolution encoding, and decoding algorithms such as Viterbi, Sequential and Feedback, RS codes and turbo codes.

Core-IV DS-502: Micro Electronics

Teaching Scheme

Lectures : 3 hrs/week

Examination Scheme

T1, T2- 20 Marks, End-Sem Exam- 60

Course Outcomes:

At the end of the course, students will demonstrate the ability to

- Understand of major areas and challenges in Microelectronics applied to digital systems design

- Formalize a processor design approaches, data path design, synthesis, testing and power perspective
- Design processor peripherals used for engineering applications
- Understand synthesis tool development & its debugging capabilities.
- Realize impact of Microelectronics for mobile platform applications
- Encourage to design & replace existing designs using modern VLSI skills

Syllabus Contents:

Unit 1: Integrated Circuit Technology, Full custom, semi custom, (gate array / standard cell), Review of different approaches for digital system design, MUX based and LUT based design perspective for HDL implementation, Multiplexer restructuring for CPLD, FPGA implementation, State Machine approach for HDL based design,

Unit 2: Combinational and Sequential Logic, RT level Custom Single purpose Processor design and optimization, General Purpose Processor- data path, control unit, memory, instruction and pipelining, programmer's view and software aspects Hardware Timing Issues, Clock related issues, verification and validation, signal integrity

Unit 3: Introduction to interfacing processor with peripherals, UART, LCD controllers, Timers, Interfacing and arbitration issues, Serial and parallel communication, ADC/DAC blocks, IP related considerations

Unit 4: Graph theory and its relevance to synthesizable constructs, Walks, trails paths, connectivity, components, mapping/visualization, nodal and admittance graph.

Unit 5: Technology independent and technology dependent approaches for synthesis, optimization constraints, Synthesis report analysis, testing (stuck-at-model, path sensitization, Design for Testability (DFT) and BIST), and verification issues for digital system designs.

Unit 6: Low power system perspective- power gating, clock gating, adaptive voltage scaling (AVS), Static voltage scaling, Dynamic clock frequency and voltage scaling (DCFVS), , power down techniques, power consumption verification, mobile platform based application, packaging and pin count.

PSEC–I DS-514: System programming and Operating Systems

Teaching Scheme

Lectures : 3 hrs/week

Examination Scheme

T1, T2- 20 Marks, End-Sem Exam- 60

Course outcome

At the end of the course, students will demonstrate the ability to:

- Learn Scheduling and communication.
- Learn hierarchical file structures.
- Have knowledge on Security & protection.

Syllabus Contents:

Evolution of operating system, Batch, timesharing, multiprogramming, multi tasking and distributed and real time. Unix O.S. Fundamentals: System concepts, system components, O.S. Services , System Calls, System Programs, System Structures, Virtual Machines. Process concept, interleaved I/O and CPU burst; process states; O.S. services for process management, co-operating processes , thread, Inter process communication scheduling algorithm, multi processor scheduling , real time scheduling and synchronization – Need for interprocess synchronization, critical section problem, , H/W support for mutual exclusion, Semaphores classical problems of synchronization critical region and conditional, critical regions : Monitors, deadlock- principle, detection, prevention and avoidance, messages for inter process communication and synchronization, classical problems in concurrent programming viz. producer/consumer/reader/writer with and without bounded buffer. Contiguous and non-contiguous, paging, segmentation – concepts, Virtual memory, management of Virtual memory: demand paging performance of demand paging page replacement algorithms thrashing. File Organization, concept of files & directories, Hierarchical structure of file, space allocation, Free space management, Security issues, and Protection mechanism. Goals of protection domain of protection access matrix implementation of access matrix revocation of access rights security problems authentication program threats, system threats, threat monitoring

Reference Books:

- Milenkovic, “Operating System Concepts and Design”, McGraw Hills.

PSEC-I DS-516: Embedded Software and RTOS

Teaching Scheme

Lectures : 3 hrs/week

Examination Scheme

T1, T2- 20 Marks, End-Sem Exam- 60

Course Outcomes:

At the completion of the subject, students should be able to

- Evaluate the need for real-time operating system and implement the real-time operating system principles and the use of multitasking techniques in real-time systems.
- Understand the features and structures of practical implementations and how application areas impact on real-time operating system facilities.

Syllabus Contents:

RTOS Concepts: Foreground and background systems, Critical section, Shared Resources, Tasks, Multitasking, Context Switching, Kernels, Pre-emptive and non pre-emptive Schedulers, Static and Dynamic Priorities, Priority Inversion, Mutual exclusion, Synchronization , Inter task communication mechanisms, Interrupts: Latency, Response and recovery, Clock Tick, Memory Requirements. Structure of μ COS-II - Kernel Structure: Tasks, Task States, TCB, Ready List, Task Scheduling, Task Level Context Switching, Locking and unlocking of scheduler, Idle Task, Statistics Task, Interrupts, Clock Tick, Initialization, Starting the OS, Task Management, Time Management, Event Control Blocks, Synchronization in μ COS-II - Semaphore Management, Mutual Exclusion Semaphores, Event Flag Management, Communication in μ COS-II - Message Mailbox Management, Message Queue Management, Memory management, MCB, Porting of μ COS-II: Development Tools, Directories and Files, Configuration and testing of Port, Real Time Application using μ COS-II.

PEC-II DS-518: Pattern Recognition and Classification

Teaching Scheme

Lectures : 3 hrs/week

Examination Scheme

T1, T2- 20 Marks, End-Sem Exam- 60

Course outcomes:

On completion of the course, the students should be able to:

- Understand object description and recognition techniques
- Understand, Design and implement classification techniques
- Understand the mathematical concepts of pattern recognition
- Apply pattern recognition techniques to object detection and classification.

Syllabus Contents:

Background of statistics:

Shape representation and description : Region identification, contour based shape representation and description, chain codes, simple geometric border representation, Fourier transforms of boundaries, boundary description using segment sequences, B spline representation, other contour based shape description approaches Shape invariants, Region based shape representation and description, Simple scalar region descriptors, moments, convex hull, graph based on region skeleton, region decomposition, region neighborhood graphs, shape classes. Mathematical morphology: Basic morphological concepts, four morphological principles, binary dilation and erosion, hit or miss transformation, opening and closing, gray scale dilation and erosion, thinning and skeletonization, gray scale dilation and erosion ,properties of erosion and dilation, opening and closing, top hat transformation, statistical texture description, methods based on spatial frequencies, co - occurrence matrices, edge frequency, other statistical methods of texture description. Knowledge representation and decision making : Knowledge representation, statistical pattern recognition, classification principles, classifier setting, classifier learning , Baye's classification, nearest neighbor classification, cluster analysis. Artificial neural networks and fuzzy systems: Neural nets, feed forward networks, unsupervised learning, Hopfield neural nets, optimization techniques in recognition, genetic algorithms, simulated annealing, fuzzy systems, fuzzy sets and fuzzy membership functions, fuzzy set operators, fuzzy reasoning, fuzzy system design and training.

PSEC-II DS-528: Advanced Embedded Architecture

Teaching Scheme

Lectures : 3 hrs/week

Examination Scheme

T1, T2- 20 Marks, End-Sem Exam- 60

Course Outcomes:

At the completion of the subject, students should be able to

- Identify and select the features, hardware and software both, supported by underlying embedded platform.
- Develop and evaluate performance of mini-projects using the above selected embedded platform.
- Incorporate the operating system into the implementation to meet several design constraints.

Syllabus Contents:

IA32 and IA64 processor architecture: Addressing modes: real, big-real, protected, paging, SMM, 64-bit extensions, Registers, Memory access and the memory map, Instruction set, Segmentation, Task switching, Paging, Hyper threading, Caches and TLB, Extension pipeline, x86 legacy features, Interrupts, PIC and APIC, Software optimization, VT Overview Front Side Bus (FSB) architecture: Transactions and packets on the bus, Signal groups, Phases on the bus, Locking Transactions, Cache snooping, I/O transactions, Address alignment, Power management features. Platform Overview: Chipset overview, PCI configuration setup, Logical PCI bus 0, DDR2, SPD and BIOS, BIOS boot-up sequence, BIOS responsibilities, BIOS configuration, ACPI overview, PCI express overview, USB overview. Power Management: Frequency changes, Sleep states, traditional C states plus C_A, C_{Ae}, C₆, Thermal monitoring, L2 cache power down, Platform power consumption.

Embedded Software Development Suite assignments:

- Installing, Booting, and running a complete software stack (Download and install the SDK; Develop a simple app that performs a button-activated text alteration)
- Enable a peripheral device (Enable the GPS driver, use the GPS device to get the locations and plot it on a simple map in runtime)
- Enable and showcase remote communication between two systems (one Atom system+ one atom/other)

- Intel ® and IA-32 Architectures Software Developer's Manual, Volume 1: Basic Architecture

LC DS-508: PG Laboratory – II

Teaching Scheme

Practicals: 8 hrs/week

Examination Scheme

Marks - 100

DEC II: Source Coding and Channel Coding Lab

Laboratory Outcomes:

At the end of the laboratory work, students will demonstrate the ability to:

- Acquire skills of C and Matlab programming pertaining to various source and channel coding algorithms
- Understand the principles and intricacies involved in basic data structures and algorithms required for such programming
- Awareness of global data compression standards such as JPEG, MPEG, G.7xx and H.2xx

List of Experiments:

1. Write MATLAB code to find entropy and probabilities of given symbols and plot entropy.
2. Write MATLAB and C code for Arithmetic Coding.
3. Write MATLAB code for Entropy Coding.
4. Write MATLAB code for Huffman Coding.
5. Write MATLAB code for 2-D Logarithmic search algorithm.
6. Write MATLAB code for Full search algorithm.
7. Write MATLAB code for Parallel Hierarchical 1-D search algorithm.
8. Write MATLAB code for search algorithm using Pixel subsampling and Pixel Projection.

Core IV Microelectronics Lab

Laboratory Outcomes:

At the end of the laboratory work, students will demonstrate the ability to:

- Design processor peripherals used for engineering applications
- Understand synthesis tool development & its debugging capabilities.
- Realize impact of Microelectronics for mobile platform applications.

List of Experiments:

The Laboratory sessions comprises of HDL (VHDL/VERILOG) experiments to evolve graded design to qualify for an IP realization using simulation and synthesis techniques

1. State machine implementation of Matrix Multiplication algorithm using one adder and one multiplier and its realization using three adders and six multipliers
2. Data paths design for simple processor
3. Demonstration of Instruction Pipelining with simulation Complete HDL based design of a simple processor- implementation, testing and verification
4. Estimating power consumption of two simple design modules
5. Optimization of area, speed, power parameters for high speed operation of interfacing module like UART, Parallel communication port
6. Exposure to RI Tools (Microcontroller Simulator, Builder of State machines, Timing-diagram Solution) for Programming Embedded Systems

PSEC-I Embedded Software and RTOS Lab

Laboratory Outcome:

At the end of the laboratory work, students will demonstrate the ability to:

- Understand the features and structures of practical implementations and how application areas impact on real-time operating system facilities.

List of Experiments:

1. Controlling of peripherals without using μ C/OS -II services.
2. Study of Task creation using OSTaskCreate()
3. Study of Task creation using OSTaskCreateExt()
4. Exploring multitasking features of μ C/OS -II.
5. Study of Semaphore Service of μ C/OS -II.
6. Study of Mutex Service of μ C/OS -II.
7. Exploring Mailbox management Services of μ C/OS -II.

8. Exploring Message Queue Services of μ C/OS -II.
9. Study of ISR
10. Real Time Application Development using μ C/OS –II services.

PSEC - II: Advanced Embedded Architecture Lab

Laboratory Outcome:

At the end of the laboratory work, students will demonstrate the ability to:

- Familiarity with trends and GNU tools used to develop embedded computer system based on embedded OS.

List of Experiments:

Hardware Platform: Tunnel Creek boards - A state of art platform based on Intel Atom E6xx processor.

Software Platform: Timesys- Fedora 14 OS and GCC tool suite.

A. Programming Configurable Registers

1. Design MOD 10 counter that accepts pulses and outputs count on seven segment display interfaced using GPIO pins 30-37 provided by I/O chip - Winbond W83627. Use functions inb() and outb() to program the Winbond I/O chip registers to configure the GPIO registers and to control the GPIO pins.
2. Design 32 bit adder using 2-bit adder/subtractor as the basic/custom hardware interfaced at GPIO pins 30-37 provided by I/O chip - Winbond W83627. Also, add a new functionality to carry out 32 bit subtraction using the same hardware.
3. Write a program to implement calculator to perform multi-digit addition, subtraction, multiplication and division. The calculator program will accept operands and operator from the serial port UARTA of I/O chip - Winbond W83627. The result of the desired operation will be sent via the same serial port. Minicom - terminal emulation utility running on host machine will be forwarding the operands & operator inputted via keyboard and is responsible to display the received result on the screen. Use NULL modem cable to connect the serial ports of Tunnel Creek board and Host machine.

- B. Performing all the above experiments given in part 'A' using driver APIs.

PSEC- II Pattern Recognition and Classification

Laboratory Outcomes:

At the end of the laboratory work, students will demonstrate the ability to:

- Design and implement classification techniques
- Apply pattern recognition techniques to object detection and classification

List of Experiments:

1. Scene segmentation and labeling.
2. Counting objects.
3. Perimeter measurement.
4. Chain code.
5. Morphological operations (1) use of dilation and erosion for noise removal, (2) thinning and skeletonization.

6. Hough transform: (for detecting arcs of circles that are tangent to the coordinate axes).
7. Texture detection.
8. The back propagation algorithm.
9. Bayesian classification.
10. Nearest neighbor classification.
11. Clustering.
12. Character recognition on boxes on industrial belt

MLC ML-504: Intellectual Property Rights

Teaching Scheme

Lectures : 1 hrs/week

Examination Scheme

T1, T2- 20 Marks, End-Sem Exam- 60

Course outcomes:

- At the end of this course, students will demonstrate the ability.
- Create new ideas, concept to design and generate innovative solutions.
 - Write technical patents.
 - Apply knowledge for sustainable development

Syllabus Contents:

Introduction: Nature of Intellectual Property: Patents, Designs, Trademarks and Copyright. Process of Patenting and Development: technological research, innovation, patenting, development. International Scenario: International cooperation on Intellectual Property. Procedure for grants of patents, Patenting under PCT. Patent Rights: Scope of Patent Rights. Licensing and transfer of technology. Patent information and databases. Geographical Indications. New Developments in IPR: Administration of Patent System. New developments in IPR; IPR of Biological Systems, Computer Software etc. Traditional knowledge Case Studies, IPR and IITs. Registered and unregistered trademarks, design, concept, idea patenting.

MLC ML-603: Environmental Studies

Teaching Scheme

Lectures : 1 hrs/week

Examination Scheme

T1, T2- 20 Marks, End-Sem Exam- 60

Course Outcomes:

- At the end of this course, students will demonstrate the ability to understand
- Importance of environment, its purpose, design and perspectives.
 - Analysis of environmental issues related to the exploration of natural resources and development of the mankind.
 - Role of professional in protecting the environment for sustainability.
 - The solutions for environmental problems created by local, national and global developmental activities.

Syllabus Contents:

Multidisciplinary nature of Environmental studies: Definition, scope and importance, need
Natural Resources: Renewable and non-renewable resources: Natural resources and associated problems. Forest resources: Use and over-exploitation, deforestation, case studies. Timber extraction, mining, dams and their effects on forest and tribal people. Water resources: Use and over-utilization of surface and ground water, floods, drought, conflicts over water, dams-benefits and problems. Mineral resources: Use exploitation, environmental effects of extracting and using mineral resources. Biodiversity and its conservation: Introduction – Definition: genetic, species and ecosystem diversity, Biogeographically classification of India, Value of biodiversity: consumptive use, productive use, social, ethical, aesthetic and option values, Environmental Pollution: Definition, Cause, effects and control measures of Air pollution, Water pollution, Soil pollution, Marine pollution, Noise pollution, Thermal pollution, Nuclear hazards, Solid waste Management. Social Issues and the Environment: From Unsustainable to Sustainable development, Urban problems related to energy, Water conservation, rain water harvesting, watershed management, Resettlement and rehabilitation of people; its problems and concerns.

- Marine Pollution by Clark R.S. Clarendon Press Oxford
- Environmental Chemistry by De A.K., Wiley Eastern Ltd.
- Water in Crisis, Pacific Institute for Studies in Dev., Environment & Security by Gleick, H.P. 1993. Stockholm Env. Institute Oxford Univ. Press. 473p
- Global Biodiversity Assessment by Heywood, V.H & Waston, R.T. 1995.. Cambridge Univ. Press
- The Biodiversity of India by Bharucha Erach, Mapin Publishing Pvt. Ltd., Ahmedabad – 380 013,India, Email:mapin@icenet.net
- Handbook of Environmental Laws by Trivedi R.K.,Rules Guidelines, Compliances and Standards,Vol I and II, Enviro Media.

MLC ML-601: Constitution of India

Teaching Scheme

Lectures : 1 hrs/week

Examination Scheme

T1, T2- 20 Marks, End-Sem Exam- 60.

Course Outcomes:

At the end of this course, students will demonstrate the ability to

- Understand how India has come up with a Constitution which is the combination of the positive aspects of other Constitutions.
- Think laterally to solve problems considering cultural factors of society.

Syllabus Contents:

Preamble to the constitution of India. Fundamental rights under Part – III, details of Exercise of rights, Limitations & Important cases. Relevance of Directive principles of State Policy under Part – IV, Fundamental duties & their significance. Union Executive: President, Prime Minister, Parliament & the Supreme Court of India. State executive: Governors, Chief Minister, State Legislator and High Courts Constitutional Provisions for Scheduled Castes & Tribes, Women & Children & Backward classes. Emergency Provisions. Electoral process, Amendment procedure, 42nd, 44th, 74th, 76th, 86th and 91st Constitutional amendments.

DS – 601, DS-602 : Project Phase I and II

Guidelines for Dissertation Phase – I and II at M. Tech. (Electronics):

- As per the AICTE directives, the dissertation is an year long activity, to be carried out and evaluated in two phases i.e. Phase – I: July to December and Phase – II: January to June.
- The dissertation may be carried out preferably in-house i.e. department’s laboratories and centers OR in industry allotted through department’s T & P coordinator.
- After multiple interactions with guide and based on comprehensive literature survey, the student shall identify the domain and define dissertation objectives. The referred literature should preferably include IEEE/IET/IETE/Springer/Science Direct/ACM journals in the areas of Computing and Processing (Hardware and Software), Circuits-Devices and Systems, Communication-Networking and Security, Robotics and Control Systems, Signal Processing and Analysis and any other related domain. In case of Industry sponsored projects, the relevant application notes, while papers, product catalogues should be referred and reported.
- Student is expected to detail out specifications, methodology, resources required, critical

issues involved in design and implementation and phase wise work distribution, and submit the proposal within a month from the date of registration.

- **Phase – I deliverables:** A document report comprising of summary of literature survey, detailed objectives, project specifications, paper and/or computer aided design, proof of concept/functionality, part results, A record of continuous progress.
- **Phase – I evaluation:** A committee comprising of guides of respective specialization shall assess the progress/performance of the student based on report, presentation and Q & A. In case of unsatisfactory performance, committee may recommend to repeat the phase-I work.
- During phase – II, student is expected to exert on design, development and testing of the proposed work as per the schedule. Accomplished results/contributions/innovations should be published in terms of research papers in reputed journals and reviewed focused conferences OR IP/Patents.
- **Phase – II deliverables:** A dissertation report as per the specified format, developed system in the form of hardware and/or software, A record of continuous progress.
- **Phase – II evaluation:** Guide along with appointed external examiner shall assess the progress/performance of the student based on report, presentation and Q & A. In case of unsatisfactory performance, committee may recommend for extension or repeating the work.

Annexure I

Sample list of Professional Science/Elective courses offered by various departments

Branch Name	Subject Name
Civil Engineering (Construction and Management)	Environmental Impact Assessment
Civil Engineering (Environmental and Water)	Numerical Method
Civil Engineering (Geotechnical Engineering)	Advanced Mathematical Methods
Civil Engineering	Introduction to Coastal Engineering
Civil Engineering	Fortran Programming for Engineering Application
Civil Engineering	Housing and Social aspects of planning
Computer/ Information Technology	Financial Computing
Electrical Engineering (Control System)	Matrix and linear Algebra
Electrical Engineering (Power System)	Wind and Solar Energy
Electrical Engineering (Power System)	Engineering Optimization
Electrical Engineering (Power System)	Linear Systems Theory and Design
Electrical Engineering	Industrial Motion Control
Electronics and Telecommunications (Signal Processing)	Mobile Communication
Electronics and Telecommunications	Applied Statistical Physics
Electronics and Telecommunications(VLSI and Embedded)	Image processing and analysis
Electronics and Telecommunications	Artificial Intelligence
Mechanical Engineering	Finite Element and Boundary Element Methods
Mechanical Engineering	Energy Conservation and Management
Mechanical Engineering	Operation Research
Mechanical Engineering	Introduction to Nuclear Energy
Metallurgical Engineering (Physical/Process)	Electronics and Magnetic Materials
Metallurgical Engineering (Physical/Process)	Thermomechanical Processing of Metals
Metallurgical Engineering	Nanotechnology
Town and Country Planning	Quantitative Techniques
Production Engineering (Manufacturing Engineering and Automation)	Microcontroller and Applications
Production Engineering (Manufacturing Engineering and Automation)	Reliability Engineering
Production	Robot Dynamics and Analysis
Production	Commercial Law
Project Management	Project Planning and Control
Applied Physics	Laser Technology
Mathematics	Complex Analysis
Mathematics	Advanced Mathematical Methods (for all except Mech. and Instru.)
Mathematics	Advanced Mathematics
Mathematics	Engineering Mathematics for Problem Solving
Mathematics	Linear Algebra

Annexure-II:

Sample list of Liberal Learning courses offered at Institute level

Course Outcome:

Student will be able to choose and enhance practical learning and application in the subject of his/her choice.

One credit course spread over the semester to enhance practical learning and application

1. **Agriculture** (Landscaping, Farming, etc.)
2. **Business** (Management, Entrepreneurship, etc.)
3. **Defense** (Study about functioning of Armed Forces)
4. **Education** (Education system, Policies, Importance, etc.)
5. **Fine Arts** (Painting, Sculpting, Sketching, etc.)
6. **Linguistics**
7. **Medicine and Health** (Diseases, Remedies, Nutrition, Dietetics, etc.)
8. **Performing Arts** (Music, Dance, Instruments, Drama, etc.)
9. **Philosophy**
10. **Social Sciences** (History, Political Sc., Archeology, Geography, Civics, Economics, etc.)
