

Team COEP Robotics won two awards at Robocon 2015

Team COEP has won Best Manual Operators & Best Innovative Design award at Robocon 2015 held on 5th, 6th, 7th March, 2015. With best machines, dominating performance in practice sessions & super league stage; Team COEP was clearly a top contender for winning Robocon 2015. Team COEP had entered quarter final stage with first rank among 85 teams with maximum number of shuttle returns.

Unfortunately we missed a service point in quarter final game & we were knocked out. The machines built & technology used for shuttle hitting, tracking & prediction of shuttle, base drive maneuvering by Team COEP in Robocon 2015 has taken technology at National Robocon to a whole new level leaving behind all teams.

This was possible with continuous support from our sponsors Mr. Ravi Agarwal, Mr. Shantanu Kulkarni from Pepperl + Fuchs India Pvt. Ltd., Mr. Nachiket Joshi, Mr. Kunal Sahare, Mr. Mangesh Sabale from Janatics India pvt. Ltd. & Mr. Raj Iyer , COEP Alumnus. Their trust in us makes us work more harder.

As always our Director Dr. A.D. Sahasrabudhe Sir, Deputy Director Dr. B.B.Ahuja sir , Agashe Sir, Mahajan Sir, Rajhans Madam, Sapali Sir, Sapkal Sir & Ohol Sir are with us from start for everything that we need.

Support & confidence given by all faculty members was encouraging for us. We have to mention Alumni association, Mohoni Sir, Gosavi Sir, Deepak Kolate, Anish Dalvi, Gymkhana staff, production workshop staff & mamas who sometimes had to wait for an extra hour for us. We would like to thank Gonte sir , Dhangade Madam, Accounts section staff & non teaching staff of all departments who have helped us directly or indirectly in the journey. Most importantly thanks to all COEPian students for standing behind us & supporting us in every possible way.

With your support Team COEP Robotics will keep giving its best to make you feel proud of being a COEPian.

P.T.O....
