

Computer Engineering and IT Department

Best Projects 2021-22

Title Of Project	Domain/Area	Guide Name
Localizing Moments In Surveillance Videos Using Natural Language Queries	Natural Language Processing	Dr. V. Z. Attar
Crop Yield Prediction And Recommendation Using Machine Learning Algorithms	Machine Learning	Dr. V. Z. Attar
Detection And Mitigation Of Ddos Attacks In Sdn Environment Using Entropy	Security	Prof. J. Abraham
Hybrid Privacy Preservation In Location Based Advertisement	Security	Prof. J. Abraham
An Intrusion Detection System For Zero-Day Attacks To Reduce False Positive Rates	Security	Dr. V.K.Pachghare
Measuring Hallucinations In Abstractive Summaries Of Indian Legal Text	Natural Language Processing	Dr. Y.V.Haribhakta
Multi-Modal Content Summarization Final Report	Natural Language Processing	Dr. Y.V.Haribhakta
Motion Based Indian Sign Language Recognition Using Deep Learning	Deep Learning	Dr. S. B. Mane
Wordalchemy:A Transformer Based Reverse Dictionary Implementaion	Deep Learning	Dr. S. B. Mane
Feature Selection For Android Malware Detection With Machine Learning	Security	Dr. D.D. Kshirsagar
