Internship Certificate

TO WHOMSOEVER IT MAY CONCERN

*This is to certify that, Ms. Saloni Gopal Wagh, student of Government Polytechnic, Jalgaon, has undergone internship for duration of 2 months from 1/06/2019 to 31/07/2019 during 10am to 5pm, at our project **Tejashree Construction (Residential Apartment G+4)** near Gujral Petrol Pump, Jalgaon. She has majorly involved in Construction activities of RCC, BBM, Masonry etc.*

She has taken keen interest in understanding the Construction process. We hope that the practical knowledge she has gained during the internship, will help her to understand the subjects better.

We wish her all the best for further studies and career.

Date: 28/12/2019

To,
Project Manager,
J. Kumar Infraprojects Limited,
Pune Metro Rail Project, Pune.

Subject: - Internship in Maharashtra Metro Rail Corporation Limited

Dear Sir,

With reference to the above mentioned subject, it is to inform that the following candidate have to undergo practical training in Maharashtra Metro Rail Corporation Limited. The details of the candidates are as follow:-

Sr. No.	Name of Student	Date of Commencement & place of training
1	Pratiksha Deokar	From: - 26/12/2019 To: - 10/01/2020
2	Pratiksha Chavan	From: - 26/12/2019 To: - 10/01/2020

You are requested to provide Personal Protective Equipment (PPE) to the above said students on returnable basis and provide training to the students as per the above mentioned schedule.

Thanking You,

With Regards,

Karun Kumar

College of Engineering Pune (COEP)

Department of Civil Engineering

2019-2020

**Summer Internship Report of the Site
visits to the court Building**

Under the Guidance of

Javed Shaikh sir

(Engineer)

Submitted by

Prajakta Dayare

(4th semester, B.E.)

College of Engineering Pune (COEP)

Certificate

This is to certify that the summer internship at Court site at Nagpur has been completed by PRAJAKTA DAYARE student of S.Y. (civil engineering) of COEP in a satisfactory manner and in a partial fulfilment of the requirement for the degree of Bachelor of Engineering in Civil Engineering of Savitribai Phule Pune University during year 2019.

Dr.M.S. Ranadive

(Prof. and HOD civil engineering)

COEP, Pune-5.

Acknowledgement

The training opportunity we had on the site was great chance for learning & professional development. Therefore we consider ourselves very lucky to be a part of this internship. We are thankful to the official and non-officials to be kind enough to guide and acknowledge us during the entire course.

WITH GRATITUDE

Prajakta Dayare

INDEX

Sr.no.	Topics covered	Pg.no
1	Overview of the building	5
2	Safety	6
3	Mix design	7
4	Foundations	9
5	Schedule of opening	10
6	Activity (Profile levelling)	11
7	Test performed A)sieve analysis B)Compressive strength	15

Overview of Building

Our site construction consists of a 9 floored court building.

Ground floor, first and second floor are to serve for vehicle parking (therefore these floors are provided with one way ramp with a slope of 1/10); 3rd floor consists of jails and court rooms; 4th floor to 9th floor are to be used for court official work, moreover 9th floor consists of canteen.

The **L shaped** building consists of 9 staircases, 11 lifts;

Two **Expansion joints** are provided (it is an assembly designed to safely absorb the temperature induced expansion and contraction of construction materials)

Expansion Joint

Safety

1) Out of the nine, 2 staircases are meant for emergency exit.

2) **Fire sprinkler system** (for protection against fire) is installed, a pipeline with branching system is fitted to serve the purpose, (as the temp in the room exceeds 68 degree, the system gets activated)

3) Smoke detectors have also been installed.

Mix Design

Task of Mix design is to design a concrete mix for a particular strength and durability. The design of concrete mix is not a simple task on account of the widely varying properties of the constituent materials, the conditions that prevail at the site of work, in particular the exposure condition, and the conditions that are demanded for a particular work for which the mix is designed.

RMC plant has been installed at the site. Capacity of the mixing unit is 0.5m^3 concrete. **Weigh Batching** has been implemented for batching purpose. The cement is stored in godown constructed nearby.

Aggregate Feeders

Mixing Unit and conveyer belt

Material used include

- Cement (OPC cement Grade 43)
- Aggregate (10mm, 20mm)
- Sand (crushed, river)
- Water
- Admixture (K2 Selfplast)

General properties of the Prepared mix design at the site

1) Slump: 100mm

(A pump with 1400 horsepower is installed to carry the concrete at elevated places)

2) Concrete design: M25 – Structural unit of the Building

M30 – Roads

M40 – Foundations

Foundations

Before carrying out the foundation two tests have been carried out to know the SBC (Soil bearing Capacity) of the soil;

- 1) Plate load test
- 2) Bore-hole test

Foundation design implemented at the site: **Raft foundation**

Raft /Mat foundation: A Mat Foundation is a shallow foundation conceived by pouring concrete over a reinforcing material, usually rubber. A mat foundation helps to distribute weight of the structure close to the surface. Soil bearing capacity is the capacity of soil to support the loads applied to the ground. The bearing capacity of soil is the maximum average contact pressure between the foundation and the soil which should not produce shear failure in the soil.

Raft Foundation

Schedule of opening

Sr.no	Type	Size
Doors

6.	V	0.60 x 0.90
7.	V1	1.20 x 0.50
8.	V2	1.20 x 0.50

Activity: Profile levelling

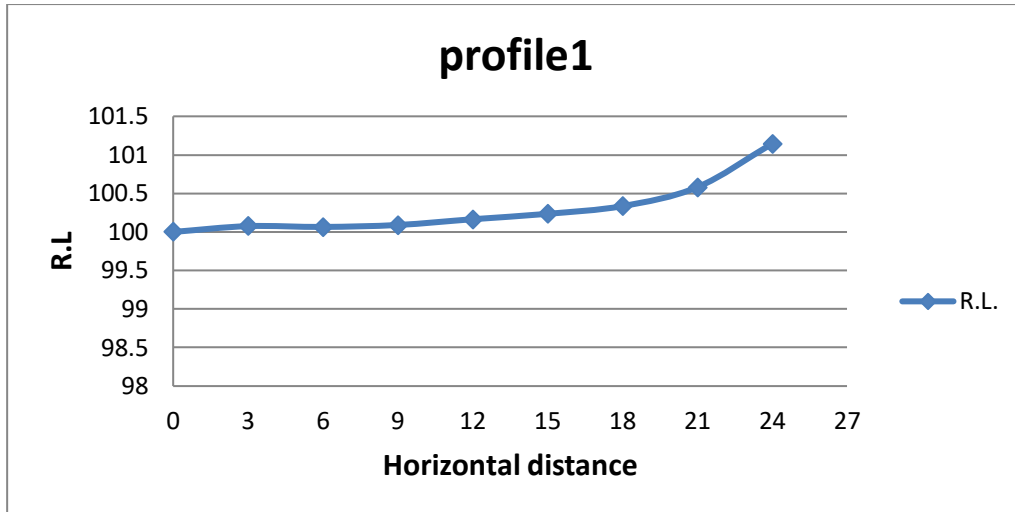

Reduce level was calculated to calculate the cut and fill quantity for construction of Road.

Procedure:

- 1) Autolevel, level staff were used for calculation of reduce level.
- 2) Height of instrument i.e. collimation method was implied.
- 3) The plinth level of the Ground floor of wing A was considered as Benchmark of R.L. 100m. (assumption)
- 4) Setting the spirit level of the autolevel, Readings were noted.

TEST PERFORMED

A) Sieve Analysis

Theory:-

The process of dividing a sample of aggregate into fraction of same particle size is known as sieve analysis. Its purpose to determine the grading or size distribution of aggregate particle which are larger than 4.75 mm (retained on IS 4.75mm sieve) constitute coarse aggregate and then those smaller constitute fine aggregate or sand. Fineness modulus of all aggregate is defined as the sum of the cumulative percentage retained on sieve of standard size divided by 100.

Apparatus:-

Set of sieve ranging from 37.5, 20, 12.5, 10, 4.75mm, 2.36mm, 1.18mm, 600(micron), 300(micron), 150(micron) pan and electronic weighing machine.

Procedure:-

- Take 6kg of coarse aggregate, 2kg of fine aggregate, 1kg of crushed sand, 1kg river sand.
- Arrange the sieve size increasing to the size, put the pan at the bottom. Put the sample in the top sieve.
- Shake the sieves for 20 min.
- Weight the amount of coarse aggregate/ fine aggregate/ crushed sand/ river sand retained on each sieve along with the pan.
- Note the reading in the tabular form.

Observation table:-

A. SIEVE ANALYSIS-

1. Total weight of aggregate = 6.376kg.
Type of aggregate= Coarse aggregate.

S.r. NO.	I.S. Sieve in mm	Wt. Retained in gms.	% Retained	Cum.% Retained	Cum.% Passing	Remark

7.	0.15	138	980	98	2	-
8.	Pan	20	1000	100	0	-

B)Compressive strength of concrete

Procedure:-

1. Place the specimen with flat faces horizontal facing upwards between plates of the testing machine.
2. Apply load axially at a uniform rate till failure occurs and note maximum load at failure.
3. The load at failure is maximum load at which the specimen fails to produce any further increase in the indicator reading on the testing machine.

Result:-

grade of concrete (f_{ck})	Load applied F(KN)	Area A (mm^2)	Compressive strength (N/mm^2)	Target mean strength $F_{ck} = f_{ck} + (1.65*s)$
M25	725	150*150	32.22	31.6
M40	950	150*150	42.2	48.25
M40	1000	150*150	44.44	48.25

Internship Certificate

This certificate is given on 5th august 2020 to certify that

Ms. Aditi Virupaksh Khurd.

A student of College of Engineering Pune has successfully completed her internship from **01-june-2020 to 31-july-2020** under the careful guidance of Ms. Anupama Ramnavmiwale and Dr. Mrs. S. N. Madhekar.

Aditi was able to successfully participate in and accomplish all of the tasks required for the project entitled '*Development of a tool for Connection Design & modelling of structures in REVIT software*' throughout which she was able to showcase her great work ethic and team player skills.

We, at DevCreate solutions LLP have thoroughly enjoyed having her as an intern and we wish her all the best in her future endeavours.
